-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-30, are drawn to generating N spot color separation and, **when superimposed**, characterized by forming a **reproduction composite image** similar in color to the color source image

II. Claim 31, are drawn to generating N spot color separation characterized by processing the generated N spot color separations to achieve **printing misregistration tolerance**.

III. Claims 32-36, are drawn to generating N spot color separation **positives** of a digital source image, and screening the processed N spot color separation **positives**.

IV. Claims 37-41, are drawn to **preparing N non-process** color separations from a source image, processing the **N non-process** color separations and screening the **N non-process** color separations.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I to IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if at least one subcombination is separately usable. In the instant case, each invention has separate utility such as operating either independently or in combination with other subcombinations according to the particular claimed limitations which characterize the invention, without requiring the particular limitations which characterize the other invention(s), as indicated above. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above, requiring separate consideration and search, restriction for examination purposes as indicated is proper.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other inventions.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
